

PLHC2011 - Physics at LHC 2011

Thursday 9 June 2011

4F Parallel - top - Trumpet room (17:00 - 19:20)

time	[id] title	presenter
17:00	[106] Top quark pair production cross section measurements in the single-lepton and di-lepton channels with ATLAS (15' + 5')	ROE, Adam
17:20	[107] Top quark cross section measurements with CMS (15' + 5')	SUMOWIDAGDO, Haryo
17:40	[108] The third generation quark sector in warped models LHC predictions from LEP/Tevatron anomalies (15' + 5')	MOREAU, Gregory
18:00	[109] Searches for Single Top-Quark Production with the ATLAS Detector in pp Collisions at $\sqrt{s} = 7$ TeV (15' + 5')	SCHWIENHORST, Reinhard
18:20	[111] Single top quark production with CMS (15' + 5')	SENGHI SOARES, Mara
18:40	[112] Top quark property measurements at ATLAS (15' + 5')	DAO, Valerio
19:00	[113] Top quark mass and other properties measurements with CMS (15' + 5')	SPEER, Thomas
