

# Ninth International Fermi Symposium

## Monday, April 12, 2021

### Exploring the Galaxy: Binaries: Parallel-2 (6:00 PM - 7:30 PM)

-Conveners: Piet Mientjes

time	[id] title	presenter
6:00 PM	[19] Origin of the broad band emission from gamma-ray binaries with a radio pulsar	CHERNYAKOVA, Maria
6:15 PM	[20] Determining the orbital parameters for the gamma-ray binaries LMC P3 and 1FGL J1018.6-5856 using SALT/HRS	VAN SOELEN, Brian
6:30 PM	[21] The origin of the powerful jets from Cyg X-3 in the soft spectral state	ZDZIARSKI, Andrzej
6:45 PM	[22] Gamma-ray heartbeat powered by the microquasar SS 433	LI, Jian
7:00 PM	[23] Probing orbital parameters of gamma-ray binaries with TeV light curves	SUSHCH, Iurii
7:15 PM	[24] Discovery of an orbital period in HESS J1832-093	MARTÍ-DEVESA, Guillem
