

Ninth International Fermi Symposium

Saturday, 17 April 2021

Exploring Data Analysis: Parallel-13 (15:00 - 16:30)

-Conveners: Benoit Lott

time	[id] title	presenter
15:00	[115] Point source location and classification at GeV energies using image segmentation and classification neural networks	PANES, Boris ECKNER, Christopher ZAHARIJAS, Gabrijela JOHANNESSON, Gudlaugur DIJKSTRA, Klaas HENDRIKS, Luc RUIZ DE AUSTRI, Roberto CARON, Sascha
15:15	[116] A comprehensive power spectral density analysis of astronomical time series: the gamma-ray light curves of selected Fermi blazars	ZYWUCKA, Natalia
15:30	[117] Eliminating single-band dominance in dual-band pulsar light curve fitting	SEYFFERT, Albertus
15:45	[118] Assessment of the data-model agreement in Fermi-LAT data analysis	BRUEL, Philippe
16:00	[119] An observational determination of the extragalactic background light from the HST/CANDELS survey in the Fermi and CTA era	SALDANA-LOPEZ, Alberto
16:15	[120] What Racing Distant Fermi GRB Photons Can Tell Us About our Universe	NEMIROFF, Robert
