【309】 Search for Lepton Flavour Universality Violation at CMS

Tuesday, August 31, 2021 3:30 PM (15 minutes)

Lepton flavour universality tests, that could reveal hints for new beyond the Standard Model phenomena, can be pursued with data collected by the CMS experiment at a center of mass energy of 13 TeV. During the talk, a specific measurement will be presented, with focus on the approaches and methodology pursued, showing the performances involved towards the finalisation of the measurement.
