

The end of the Earth, the Sun and the Universe

Team members:

- Anja Krtalić
- Ivan Glibić
- Matej Kraljević
- Teodora Anđelić

Our plan:

- Short program, modeled on documentary shows from Neil deGrasse Tyson and other similar astrophysicists
- Art works made with various art techniques which present the life of the Earth, the Sun and the Universe; and the variety of theories made about the lifespan of the Universe
- Narrators will explain, following the art works, how exactly is it all going to end (based on presentation from professor Puljak)
- Background music with adapted tempo (slowly increasing, fast, slow; just like the life of the Sun)

Thank you for your attention!
