# General information

G. Iadarola

- **Phil from CSS will join the next meeting** (19 March 2021)
  - Please prepare any topic related to CSS services (AccPy, NXCALS, JAPC …) that you would like to discuss.

- Joshua and Felix prepared an **intro page on AccPy**, where they summarize also the issues they faced with python packages hosted in the standard PyPI index, which depend AccPy hosted packages.
  - Their workaround to make the package pip installable is described in the page
  - Definitely a general issue to be discussed with CSS

- IT is moving **Nag and Lahey compilers and libraries** from afs to cvmfs
  - Are there any users of these that we know of?

- Talks on GPU applications at last Compute Accelerator Forum (link)
  - Have a look if you are interested
