

Powerful Python Packaging for Scientific Codes

Thursday, July 8, 2021 2:30 PM (30 minutes)

This talk will cover the the best practices of making a highly compatible and installable Python package based on the Scikit-HEP developer guidelines and scikit-hep/cookie. There will be a strong focus on compiled extensions. The latest developments in key libraries, like pybind11, cibuildwheel, and build will be covered, along with potential upcoming advancements in Scikit-Build + CMake.
