

Create the shell experience thanks to cmd module

Monday, July 5, 2021 5:00 PM (10 minutes)

I will present the idea of the python module cmd which allows to have a shell with dedicated command, auto-completion, help.

In a second stage, I will present the customization that we have done within MG5aMC allowing to present a fully functional experience and various scenario under which this module is used.

Primary authors: MATTELAER, Olivier (UCLouvain); Prof. MALTONI, Fabio (Universite Catholique de Louvain (UCL) (BE) and Università di Bologna)

Presenter: MATTELAER, Olivier (UCLouvain)

Session Classification: Plenary Session Monday
