Wigner - Weyl calculus in description of non - dissipative transport phenomena

Wednesday, 1 September 2021 18:30 (30 minutes)

Application of Wigner - Weyl calculus to the investigation of non - dissipative transport phenomena is reviewed. We focus on the quantum Hall effect, Chiral Magnetic effect, and Chiral separation effect, and discuss the role of interactions, inhomogeneity, and deviations from equilibrium.

Is this abstract from experiment?

No

Name of experiment and experimental site

N/A

Is the speaker for that presentation defined?

Yes

Details

Mikhail Zubkov, Ariel University, Israel www.ariel.ac.il

Internet talk

Yes

Primary author: ZUBKOV, Mikhail (Ariel University, Israel and ITEP, Russia)

Presenter: ZUBKOV, Mikhail (Ariel University, Israel and ITEP, Russia)

Session Classification: Workshop on Lattice and Condensed Matter Physics
