High energy QCD Lipatov's effective action in Euclidean space

Tuesday 31 August 2021 11:30 (30 minutes)

The continuation of high energy QCD Lipatov's effective action to Euclidean space is performed. The resulting Euclidean QCD RFT action
is considered separately in Euclidean "light-cone" coordinates and axial gauge suitable for the numerical and analytical calculations correspondingly.
The further application of the obtained results is also discussed.

Is this abstract from experiment?

No

Name of experiment and experimental site

N/A

Is the speaker for that presentation defined?

Yes

Details

Sergey Bondarenko, Ariel University, Israel

Internet talk

Yes

Primary author: Prof. BONDARENKO, Sergey (Ariel University, Israel)

Presenter: Prof. BONDARENKO, Sergey (Ariel University, Israel)

Session Classification: Workshop on Lattice and Condensed Matter Physics
