## LHCb highlights

*Tuesday, 24 August 2021 08:30 (30 minutes)*

The LHCb detector at the LHC specialises in studying decays of beauty and charm hadrons, with excellent tracking, secondary vertex reconstruction and particle identification capabilities. Here we present an overview of recent highlighted results from the broad physics programme at LHCb, including the flavour anomalies and precise determination of CKM parameters. The detector is currently undergoing a large upgrade, the extent and physics potential of which will briefly be discussed.

### Is this abstract from experiment?

Yes

### Name of experiment and experimental site

LHCb

### Is the speaker for that presentation defined?

Yes

### Details

Dr. Elena Graverini, EPFL, Lausanne, Switzerland

### Internet talk

No

**Primary author:** GRAVERINI, Elena (EPFL - Ecole Polytechnique Federale Lausanne (CH))

**Presenter:** GRAVERINI, Elena (EPFL - Ecole Polytechnique Federale Lausanne (CH))

**Session Classification:** A High Energy Particle Physics
