Pyxel Tutorial - Part 2

Tuesday 15 June 2021 16:25 (1h 35m)

In the second Pyxel tutorial session we take a deeper look into the three advanced modes of using Pyxel through different Jupyter notebook examples. The three modes are: parametric for running the pipeline multiple times looping over a range of parameters, dynamic for simulating time-dependent effects, and calibration for optimizing models or detector parameters to fit target data sets.

Authors: ARKO, Matej (ESA); SERRA, Benoit (ESO); LEMMEL, Frederic (ESA); GEORGE, Elizabeth (ESO); PROD'HOMME, Thibaut (European Space Agency)

Presenters: ARKO, Matej (ESA); SERRA, Benoit (ESO); LEMMEL, Frederic (ESA)

Session Classification: Pyxel hands-on

Track Classification: Tutorials
