

VBSCan closing MC meeting

our main aim and legacy

This COST Action will connect all main players studying Vector Boson Scattering at hadron colliders, gathering the solid and multidisciplinary community needed and aims to become the worldwide reference on Vector Boson Scattering, bringing together experimentalists, theorists, and statisticians. The capacity of the community will be maximised with a thorough inclusiveness campaign, targeting early career investigators, gender balance and maximal geographical openness.

we should be proud of our work

- the community is very solid and interconnected
- with a lot of young people actively producing the most interesting results and covering responsibility roles
- many results showed during the conference come from the four years of work of VBSCan, and are very relevant for our field
- the outcome of our studies is instrumental for the future roadmap of VBS and of the studies of the EW sector of the Standard Model

thanks to everybody!

thanks to everybody!

- all those who helped in writing the proposal
- all participants in the Action activities
- editors of papers
- organisers of events
- MC members
- WG leaders: Ilaria Brivio, Lucrezia Stella Bruno, Roberto Covarelli, Kristin Lohwasser, Joany Manjarres, Matthias Mozer, Giacomo Ortona, Kadri Ozdemir, Mathieu Pellen, Chara Petridou, Magdalena Slawinska, Philip Sommer, Ivica Puljak, Marco Zaro
- Chairs: PG, Matthias Mozer, Marco Zaro
- Ralph Stübner and Milena Stoyanova

practical matters: the final report

- achievement of the Action objectives (20 of them: 10 physics-related, 10 networking-related): self-assessment and motivation
- achievement of the Action deliverables (18 of them, several already achieved)
- additional outputs: publications, proposals, others
- impacts on the physics of VBS and on our research environment
 - general consideration of young people careers
- dissemination: report on all our dissemination activities
- success stories: the two most relevant ones to be described
- other matters: major difficulties and our solutions, feedback to COST, future plans and emerging topics on our research matter

our future

- discussion on a possible participation in future COST selection rounds after the coffee break
- keep the momentum and organise a workshop in 12-18 months from now
- do we want an internal structure to be maintained?
