

Distributed Computing Monitoring Shifts

Dario Barberis

Genoa University/INFN

ADCoS Shifts

- ADCoS are Class 2 shifts
 - Shifters are distributed world-wide and communicate via ADC Virtual Control Room or emails
- Main duties are
 - Monitoring progress of DDM transfers between T1s and corresponding T2s
 - MC production
 - Group production and reprocessing jobs
 - Reporting/escalation of observed issues
- All the necessary shift information is available on the ADCoS TWiki page
 - <https://twiki.cern.ch/twiki/bin/view/Atlas/ADCoS>
- The most recent tutorial occurred in July
 - Agenda is available at <http://indico.cern.ch/conferenceDisplay.py?confId=94971>
 - Introductory talk to ADCoS is at <http://indico.cern.ch/getFile.py/access?contribId=1&resId=0&materialId=slides&confId=94971>
