

6th RD51 Collaboration Meeting

Friday 8 October 2010

WG2: Common Characterization and Physics Issues - Hotel Palace (09:00 - 12:30)

time	[id] title	presenter
09:00	[80] Double LEM with 2D readout in liquid Argon	RESNATI, Filippo
09:20	[81] First tests of micromegas in double-phase Liquid Argon	DELBART, Alain
09:40	[86] First operation of GridPix in pure argon at low temperature	VAN DER GRAAF, Harry
10:00	[93] GEM detector for neutron beam diagnostic	CROCI, Gabriele
10:20	Coffee break	
10:40	[82] Challenges for a High-Rate TPC with MPGD Readout	KAPLAN, Daniel
11:00	[84] Characterization of Micromegas resistive detectors for the MAMMA project	Dr ATTIE, David
11:20	[94] Latest results on Micromegas for the ATLAS muon spectrometer upgrade	POLYCHRONAKOS, Venetios
11:40	[95] Pixellized Micromegas for COMPASS	VANDENBROUCKE, Maxence
