

Session Program

7-8 Jun 2021

pre-GDB [Data-centre network architectures workshop] *remote-only* - missing recordings

Contributions

Monday 7 June

15:10

Contributions

Session

15:10–15:30

The Nightmare of Securing a Multi-Purpose Computer Centre

Speaker

Stefan Lueders

15:35–15:55

The RARE routing platform and its use in data-centres

Speaker

Frédéric Loui

16:00–16:20

The CERN datacentre network

Speaker

Vincent Ducret

16:30–16:50

Coffee break

16:50–17:10

CERN datacentre virtualization services

Speaker

Ricardo Rocha

17:15–17:35

The AGLT2 data-centre network

Speaker

Shawn Mc Kee

17:40–18:00

SARA datacentre network

Speakers

Bas Kreukniet, Sander Boele

18:20

Tuesday 8 June

15:00

Contributions

Session

15:00–15:05 **Meeting re-start**

15:05–15:25 **The KISTI datacentre**

Speaker

Jin Kim

15:30–15:50 **The UK RAL datacentre network**

Speaker

Jonathan Churchill

16:00–16:20 **The BNL datacentre**

Speaker

Alexandr Zaytsev

16:30–16:50 **Coffee break**

16:50–17:10 **The Fermilab Network Architecture and implementation experience**

Speaker

Andrey Bobyshev

17:10–17:30

Requirements for data centers supporting multi-petabyte transactions

Speaker

Harvey Newman

17:30–18:00 **Time for Discussion**

18:00
