## **A Summary of Timing Measurements at Fermilab for TOF-PET**

*Friday, 10 June 2011 16:30 (20 minutes)*

We have performed comparative measurements of timing resolution at Fermilab, using several types of photodetectors, data acquisition and analysis techniques and will show the applicability for time-of-flight improvements to PET imaging. In addition, we will outline a future program for SiPM readout of PET systems.
