Possible contribution to HEP-Score from IJCLab

- Dell R6525 with 2 EPYC 7702
  - 128 threads, 256 hyperthreaded
  - 512 GB memory
  - CentOS 7
  - Exclusive use for the benchmark possible
  - As a standalone machine or as a (whole node) VM in a cloud (OpenStack)
- 1 person with benchmark expertise (Emmanouil Vamvakopoulos) ready to help
- Other more traditional HW available at site, mainly Dell FX2 with various Intel processors from the last years, if useful
