

Jet Timing for LLP Searches

Tuesday, 13 July 2021 15:15 (15 minutes)

The search for long-lived particles (LLP) at the LHC can be improved with timing information. If the visible decay products of the LLP form jets, the arrival time is not well-defined. In this talk, I will discuss possible definitions and how they are affected by the kinematics of the underlying parton-level event.

Are you are a member of the APS Division of Particles and Fields?

No

Primary authors: WANG, LianTao (University of Chicago); CHIU, Wen Han (University of Chicago); LOW, Matthew (Fermilab); LIU, Zhen (University of Minnesota)

Presenter: CHIU, Wen Han (University of Chicago)
