# Summary

Code available at https://github.com/songninggiang/FANFIC

- More precise mixing parameters: JUNO, DUNE, HK...
- Better flavor ratio measurement: IceCube-Gen2, P-ONE, KM3NeT, GVD, TAMBO...
- Pin down the production mechanism at source, robust against non-unitarity Constrain neutrino decay and neutrino lifetime

To do:

- Energy spectral analysis

DPF 2021

Ningqiang Song (<u>ningqiang.song@queensu.ca</u>)

• More new physics: leptoquarks, Z', microscopic BHs, long-lived particles
