  - $pp \to F\overline{F} \to \mu s\overline{\mu}s$

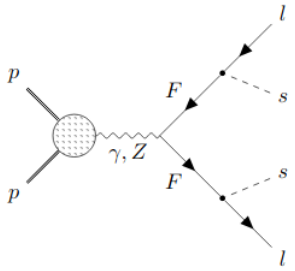

Figure: Decay process of F

Simulation

- Events Generation:
  - 1,000 generated events.
  - Generation: $pp \rightarrow F\overline{F}$ and $F\overline{F} + Jet$, $F \rightarrow \mu s$ in 13 TeV.
  - Generation: $pp \rightarrow F\overline{F} + Jet$, $F \rightarrow \mu s$ in 13 TeV.
  - Select the Jet in each event with PT $\geq$ 20 GeV/c.
- Goal:
  - Observe the shape of the graph.

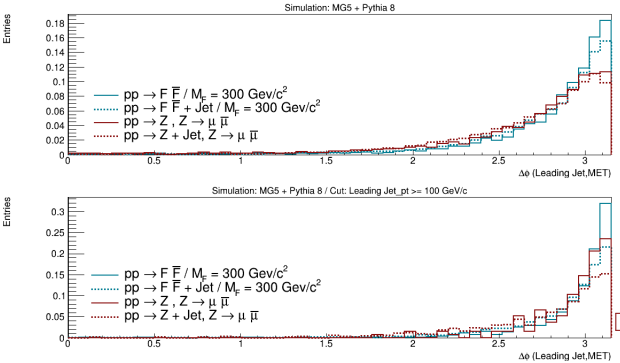
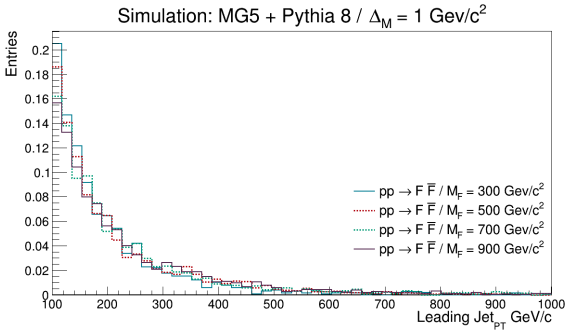
Simulation



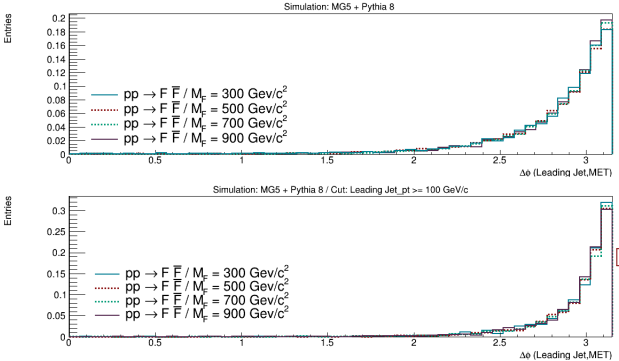
- Events Generation:
  - 10,000 generated events.
  - Generation: $pp \to F\overline{F}, F \to \mu s$ in 13 TeV.
  - Generation: $pp \to F\overline{F} + Jet$, $F \to \mu s$ in 13 TeV.
  - Generation: $pp \to Z \to \mu\overline{\mu}$ in 13 TeV.
  - Generation: $pp \to Z + Jet$, $Z \to \mu\overline{\mu}$ in 13 TeV.
  - Select the leading Jet in each event with PT $>=$ 100 GeV/c.
- Goal:
  - Observe the shape of the graph.

Simulation

- Events Generation:
  - 10,000 generated events.
  - Generation: $pp \rightarrow F\overline{F} \rightarrow \mu s\overline{\mu} s$ in 13 TeV.
  - Select the leading Jet in each event with PT $>=$ 100 GeV/c.
  - Difference between mass of the F particle and the S particle is 1 GeV/c^2.
- Goal:
  - Observe the shape of the graph when increasing the mass of the FIMP.

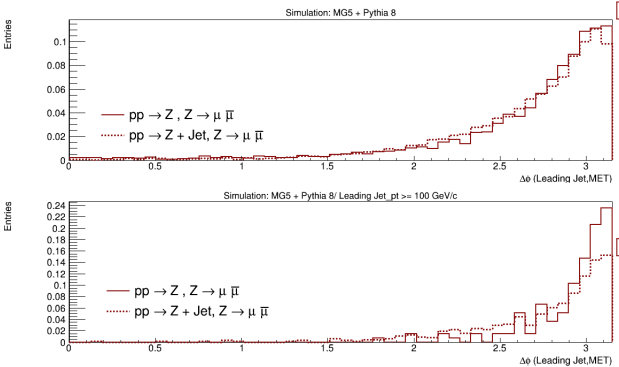


Simulation



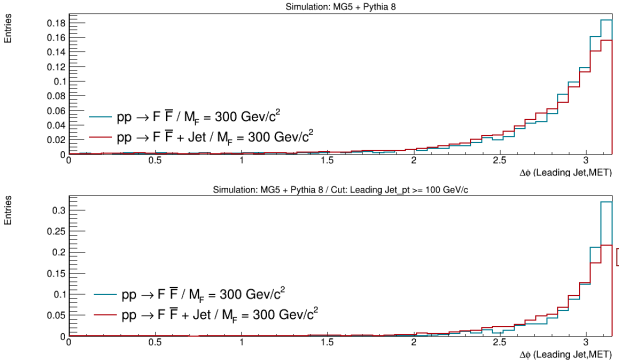
- Events Generation:
  - 10,000 generated events.
  - Generation: $pp \rightarrow F\overline{F} \rightarrow \mu s\overline{\mu}s$ in 13 TeV.
  - Select the leading Jet in each event with PT >= 100 GeV/c.
  - Difference between mass of the F particle and the S particle is 1 GeV/c^2.
- Goal:
  - Observe the shape of the graph when increasing the mass of the FIMP.

Simulation



- Events Generation:
  - 10,000 generated events.
  - Generation: $pp \rightarrow Z \rightarrow \mu\overline{\mu}$ in 13 TeV.
  - Generation: $pp \rightarrow Z + Jet$, $Z \rightarrow \mu\overline{\mu}$ in 13 TeV.
  - Select the leading Jet in each event with PT $>=$ 25 GeV/c or 100 GeV/c.
- Goal:
  - Observe the shape of the graph when Z and $Z + Jet$ are generated.

Simulation



- Events Generation:
  - 10,000 generated events.
  - Generation: $pp \rightarrow F\overline{F}, F \rightarrow \mu s$ in 13 TeV.
  - Generation: pp $\rightarrow$ F $\overline{F} + Jet, F \rightarrow \mu\ s$ in 13 TeV.
  - Select the leading Jet in each event with PT $>=$ 100 GeV/c.
- Goal:
  - Observe the shape of the graph when $F\overline{F}$ and $F\overline{F} + Jet$ are generated.

Simulation

- Events Generation:
  - 10,000 generated events.
  - Generation: $pp \rightarrow F\overline{F}, F \rightarrow \mu s$ in 13 TeV.
  - Generation: $pp \rightarrow F\overline{F} + Jet,\ F \rightarrow \mu s$ in 13 TeV.
  - Generation: $pp \rightarrow Z \rightarrow \mu\overline{\mu}$ in 13 TeV.
  - Select the leading Jet in each event with PT $>=$ 25 GeV/c.
- Goal:
  - Observe the shape of the graph and check the proportionality relationship between PT and MET
