

Dr. Soboyejo was a Professor in Mechanical and Aerospace Engineering at Princeton University for approximately 17 years. He founded the U.S./Africa Materials Institute at Princeton, one of six international materials institutes supported by the National Science Foundation. He has also served as President and Provost of the African University of Science and Technology (AUST) in Abuja, Nigeria, a Pan-African university founded by the Nelson Mandela Institutions (NMI). He is a materials scientist whose research focuses on biomaterials and the use of nanoparticles for the detection and treatment of disease, the mechanical properties of materials, and the use of materials science to promote global development.
