

Mahouton Norbert Hounkonnou is a full Professor of Mathematics and Physics at the University of Abomey-Calavi, Cotonou, Benin. He is the President of the Network of African Science Academies (NASAC). He published over 200 refereed research papers in outstanding ISI-ranked journals and international conference proceedings in the fields of mathematics, mathematical physics, and theoretical physics.

He is a co-authored and reviewed books, and serves as an associate editor for renowned journals in mathematics, mathematical physics, and theoretical physics.

His research deals with noncommutative and nonlinear mathematics including differential equations, operator theory, coherent states, quantization techniques, orthogonal polynomials, special functions, graph theory, nonassociative algebras, nonlinear integrable systems, noncommutative field theories and geometric methods in physics
