

Expectations on Management and Performance Evolution: Lessons from Tevatron and Other Colliders.

Thursday 27 January 2011 18:40 (25 minutes)

The talk will discuss the luminosity evolution of the Tevatron collider at different stages of the Collider Runs Ia, Ib and II, emphasize general dynamics of the process, analyze planned and delivered luminosity integrals, discuss the expectation management lessons, and compare with other colliders.

Presenter: Dr SHILTSEV, Vladimir (Fermilab)

Session Classification: Session 08 High Luminosity (HL-LHC)
