

RD51 Collaboration Meeting and Topical Workshop on FE electronics for gas detectors

Tuesday 15 June 2021

WG1 - Technological Aspects and Development of New Detector Structures (09:00 - 12:00)

-Conveners: Paul Colas; Filippo Resnati

time	[id] title	presenter
09:00	[61] A Large-area RWELL Prototype for CEPC-DHCAL Application	HONG, Daojin
09:30	[62] Development of Micromegas detectors with high radio-purity and energy-resolution using a thermal bonding method for the PandaX-III experiment	WEN , Sicheng ZHOU, yi
10:00	[63] EIC and sPhenix tracker development	REVOLLE, Maxence VANDENBROUCKE, Maxence
10:40	Break	
11:00	[64] A new readout scheme for gaseous detectors	LAKTINEH, Imad
11:30	[115] Compact TPC with GridPix Readout: PID and tracking option for the ATHENA Detector at EIC	GARG, Prakhar
