## The $\mu$ -RWELL-based preshower and muon detectors of the IDEA detector concept

The IDEA detector concept has been designed to operate at a future large circular  $e^+e^-$  collider, like FCC-ee or CEPC. IDEA has an innovative design with a central tracker enclosed in a superconducting solenoidal magnet. After the magnet there is a preshower system, followed by a dual readout calorimeter. In the iron yoke that closes the magnetic field are then located three stations of muon detectors. The preshower and muon detectors employ the  $\mu$ -RWELL technology. The  $\mu$ -RWELL detector inherits the best characteristics of the GEM and Micromegas detectors, being spark robust and simple to assembly. Both the preshower and the muon detector have a modular design, with the basic  $\mu$ -RWELL tile of an active dimension of  $50 \times 50$  cm<sup>2</sup>, with the anode segmented in parallel strips. The preshower main requirement is a spatial resolution of the order of 100  $\mu$ m, while the muon detector must have a reasonable total number of channels.

In order to define the best values of the resistivity and the strip pitch, we have built 2 sets of  $\mu$ -RWELL detectors. Each set is made of 5 and 3,  $16 \times 50$  cm<sup>2</sup> detectors, with 50 cm long strips. In the preshower set the strip pitch is 400  $\mu$ m and with a varying DLC resistivity, ranging from 10 to 200 M $\Omega$ /square. In the muon detector set, the strip pitch is 800, 1200 and 1600  $\mu$ m, respectively. All these detectors have been exposed in October 2021 to a muon beam at the CERN SPS. The results obtained will be presented.

### Primary experiment

**Primary authors:** Dr DOMENICI, Danilo (INFN-LNF); Dr DE LUCIA, Erika (INFN-LNF); Dr EVANGELISTI, Federico (INFN-Fe); Dr MEZZADRI, Giulio (INFN-Fe); Dr BALOSSINO, Ilaria (INFN-Fe); Dr MORELLO, Gianfranco (INFN-LNF); Dr BENCIVENNI, Giovanni (INFN-LNF); Dr FELICI, Giulietto (INFN-LNF); Dr GARZIA, Isabella (INFN-Fe); Dr LAVEZZI, Lia (INFN-To); Dr POLI LENER, Marco (INFN-LNF); Dr SCODEGGIO, Marco (INFN-Fe); Dr GIOVANNETTI, Matteo (INFN-LNF); Dr GATTA, Maurizio (INFN-LNF); Dr BERTANI, Monica (INFN-LNF); Dr FARINELLI, Riccardo (INFN-Fe); Mr CAFARO, Vittorio (INFN-Bo); GIACOMELLI, Paolo (Universita e INFN, Bologna (IT))

**Presenter:** GIACOMELLI, Paolo (Universita e INFN, Bologna (IT))

**Track Classification:** Gaseous Detectors
