

# Higgs Pairs 2021 mini-workshop

Elizabeth Brost, Luca Cadamuro, Alexandra Carvalho,  
Arnaud Ferrari, Ramona Gröber, Katharine Leney,  
Javier Mazzitelli, Margarete Mühlleitner

September 30th, 2021

# To our success

- We just had two afternoons of very interesting talks, always followed by discussion

- Attendance was always around ~100 (~50-70) people on the first (second) day

We started from the current status of theory predictions and experimental searches and arrived up to the preparations for the future from the respective communities.

As well brainstormed on how to make the experimental results timeless and more accessible for alternative interpretations

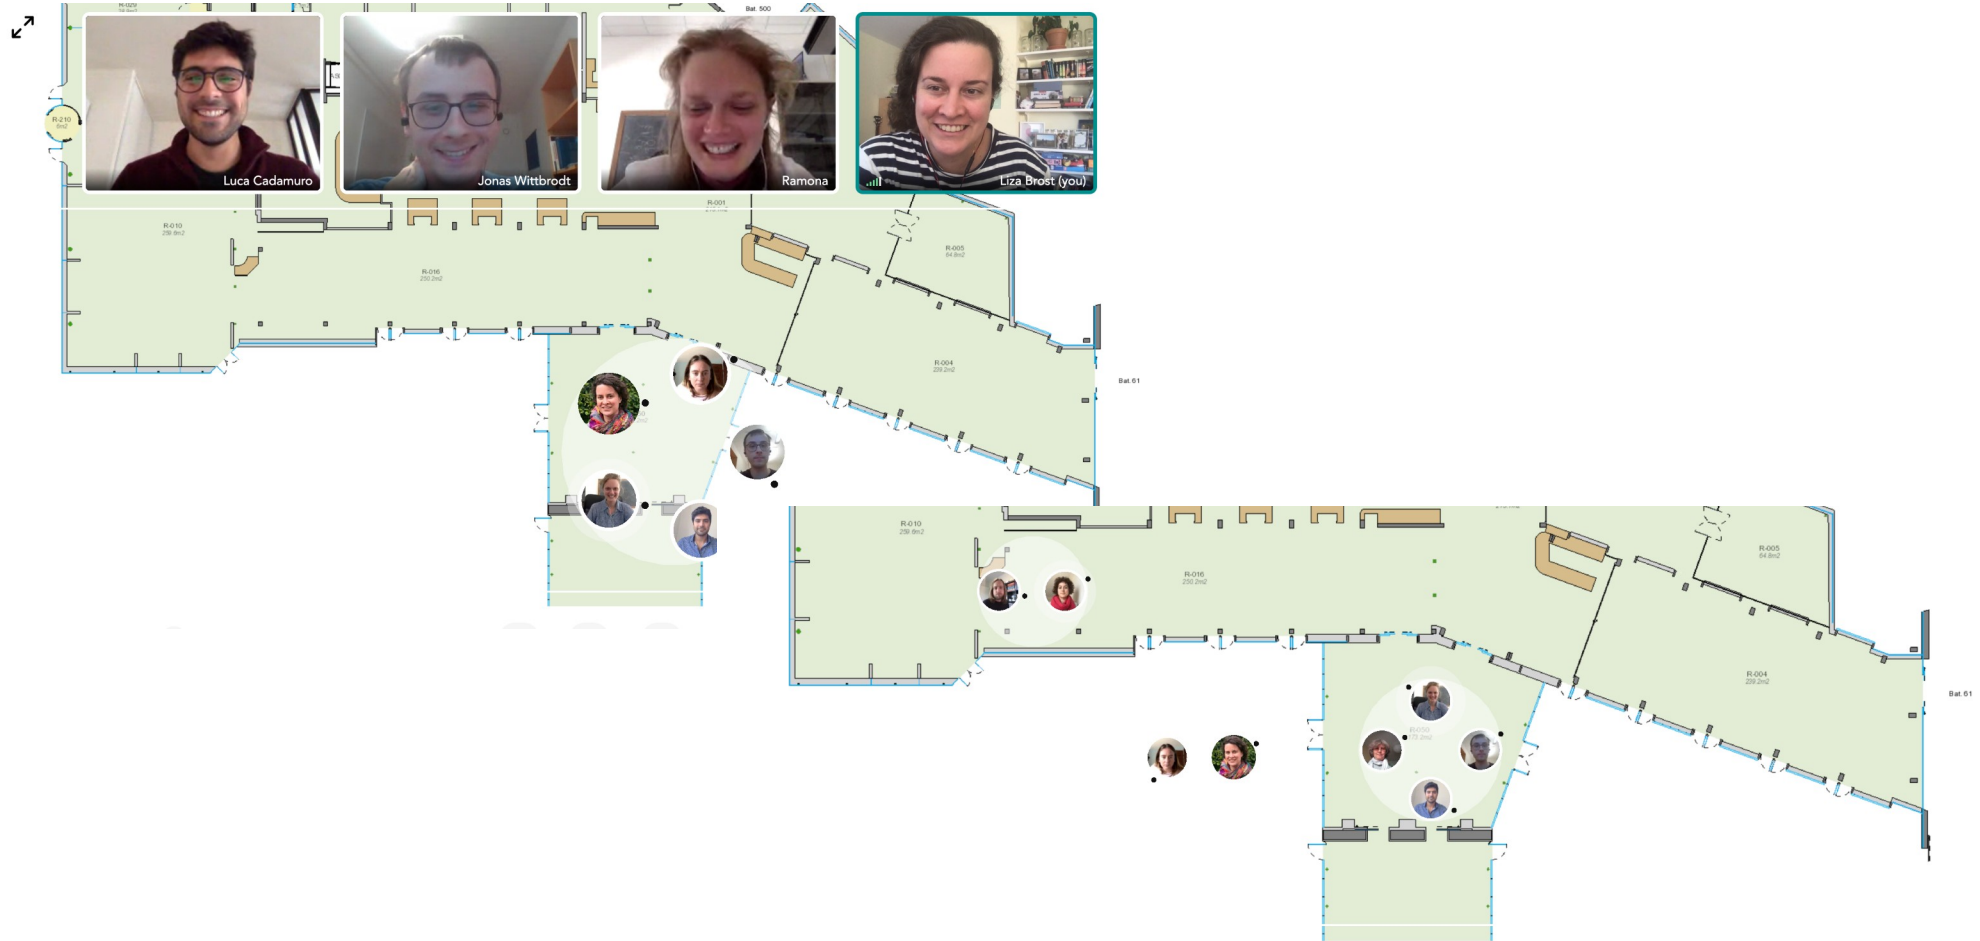

**Plenty of material to work in preparation to the in-person workshop!**

***Thank you for the speakers, chairs and audience!***

\* Recordings will be available on the indico page soon, we will notify in an email

# Online workshop, online coffee break

We had a [wonder.me](https://wonder.me) room available during coffee breaks and at the end of the afternoons

# What is next?

## Higgs Pairs 2022!

- The in-person workshop will take place in May 30th - June 3rd, 2022 in Dubrovnik, Croatia
  - We hope to be able to see you all there for a even more lively workshop!
