

Chapter 2: 1st Editor Feedback

- ▶ Short comments and observations
 - ▶ Nice account of the LHC experiments as an example of a Big Science challenges and major undertakings, flows nicely
 - ▶ A short intro would help to set the scene (CERN and LHC experiments as an example, also a reference to Chapter 3?; success & failures link also to Chapter)
 - ▶ Some overlap with Chapter 3?
 - ▶ Some condensing needed (currently 24 pages, including references)

Editor 2 - Comments

- ▶ This is an amazing chapter which brings ATLAS and CMS together- editor congratulate the authors for bringing this connection together.
- ▶ The section that explains challenges and lessons learnt is so beneficial to future investment in collider research.
- ▶ Human factors sector is so interesting and provide the basis for epistemic culture of HEP community.
- ▶ It may be useful to draw few lessons to learn from CMS and ATLAS collaboration and how future collider can learn from the experience.
- ▶ Material is so rich and good luck to editors if they have to condense such rich account to 8000 words.
