Speaker: Massimo Chiodi

10:35 → 11:00 **Infor EAM in the Handling Engineering Group**

Speaker: Cathelijne Hazelaar-Bal (CERN)

General News

Some currently ongoing activities

- **EAM Light** with workflows, checklists and electronic signatures is now **gradually replacing MTF** for QA follow-up of HL-LHC components.
- Additional cases where **Infor EAM Contract Management module will replace Gesmar** for maintenance contracts.
- Pilot project with the Coleman **Machine Learning** module **to create an Asset Risk Score** based on Work Order history.
- Improved version of the EAM Equipment Generator will facilitate Asset creation with a **strengthened Digital Thread and link to the PLM**.
