

MAP-Fis Research Conference

Friday 9 July 2021

Physical Engineering (15:40 - 17:40)

time	[id] title	presenter
15:40	[51] Wireless Powered Sensing by Thermoelectric Devices	MAIA, Margarida
16:00	[61] Online Coupled Atmospheric-aerosol Regional Forecast Model for Solar Energy Production	SILVA, Rui
16:20	[49] Thin, Lightweight, Flexible Metamaterials for Electromagnetic Interference Shielding	SOUSA, Ana
16:40	[68] Triboelectric energy harvesting in remote and harsh environments: performance characterization and novel applications	RODRIGUES, Cátia
17:00	[69] Advanced Magnetostrictive Device for Non-Destructive Testing of Critical Assets	SILVA, Joana
17:20	[65] Transparent Thermoelectric Titanium Dioxide-based Thin Films for thermal energy harvesting	RIBEIRO, Joana
