

Session Program

12-13 Nov 2010

**3rd CERN-ECFA-NuPECC Workshop on the
LHeC**

Physics session: High Parton Densities

Chavannes-de-Bogis, Switzerland

Friday 12 November

15:20

Physics session: High Parton Densities

Session | **Location:** Chavannes-de-Bogis, Switzerland | **Convener:** Nestor Armesto Perez

15:20-16:05 Overview of the HPD chapter

Speaker

Nestor Armesto Perez

16:30

16:05-16:30 Small-x physics at the LHC

Speaker

David d'Enterria

17:00

Physics session: High Parton Densities

Session | **Location:** Chavannes-de-Bogis, Switzerland | **Convener:** Nestor Armesto Perez

17:00-17:25 Predictions for F2 and FL in ep

Speaker

Javier Lopez Albacete

17:25-17:50 Nuclear pdf's

Speaker

Carlos Salgado Lopez

17:50-18:15 Exclusive vector meson production in ep

Speaker

Graeme Watt

18:15-18:40 Exclusive vector meson production in eA

Speaker

Henri Paul Kowalski

18:40-19:30 Discussion on the HPD chapter

Speakers

Anna Stasto, Brian Cole, Nestor Armesto Perez, Paul Newman

19:30
