'AOB' summary:
Third-Party-Copy test/migration: <https://its.cern.ch/jira/browse/ADCINFR-166>

=====

Site-specific issues:

1) 6/19: MWT2 - squid service degraded. Hardware failure - service was moved to a different machine. Issue resolved - https://ggus.eu/?mode=ticket_info&ticket_id=152655 was closed the next day. <https://atlas-adc-elisa.cern.ch/elisa/display/2729?logbook=ADC>.

2) 6/22: AGLT2 - squid service degraded (node sl-um-es5.slateci.io). https://ggus.eu/?mode=ticket_info&ticket_id=152708 in progress, <https://atlas-adc-elisa.cern.ch/elisa/display/2752?logbook=ADC>.

3) 6/23 early a.m.: AGLT2 - source file transfer errors ("ERROR: Copy failed with mode 3rd pull, with error: [davix2gliberr] Transfer failed: failure: Remote copy failed with status code 0: Failed to connect to IP|HOST:PORT PORT"). Some dCache nodes came online prior to AFS starting, resulting in some out-of-date CRL's. These have been updated - will close the ticket after verifying the fix. https://ggus.eu/?mode=ticket_info&ticket_id=152709, <https://atlas-adc-elisa.cern.ch/elisa/display/2753?logbook=ADC>.

Follow-ups from earlier reports:
