ErUM: Exploration of the Universe and Matter

A BMBF framework programme for basic research

Strategic and thematic framework

- of the Federal Ministry of Education and Research
- for basic research at large-scale facilities

Timeframe

- 2017 - 2027

ErUM: Exploration of the Universe and Matter

Topical overview

01 Thematic framework

02 Strategic framework

03 Implementation

04 BMBF & PT.DESY

What ErUM is about

Large-scale
research infrastructures

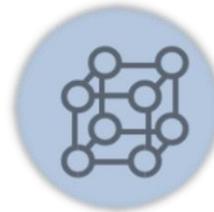

www.fis-landschaft.de

Topics: From astro-
to particle physics

Universe

Matter

Particles

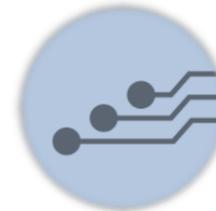

Cross-disciplinary
activities

Accelerator
development

Detector
development

Data
science

Strategic framework

Strategic framework

What ErUM achieves and in which fields it operates

Key objectives

Scientific
excellence

Future
technologies

Innovation
seeds

Talents for science and
industry

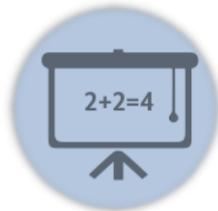

Participation

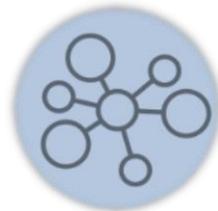

Fields of action

Large-scale
facilities

STEM
young scientists

Networking

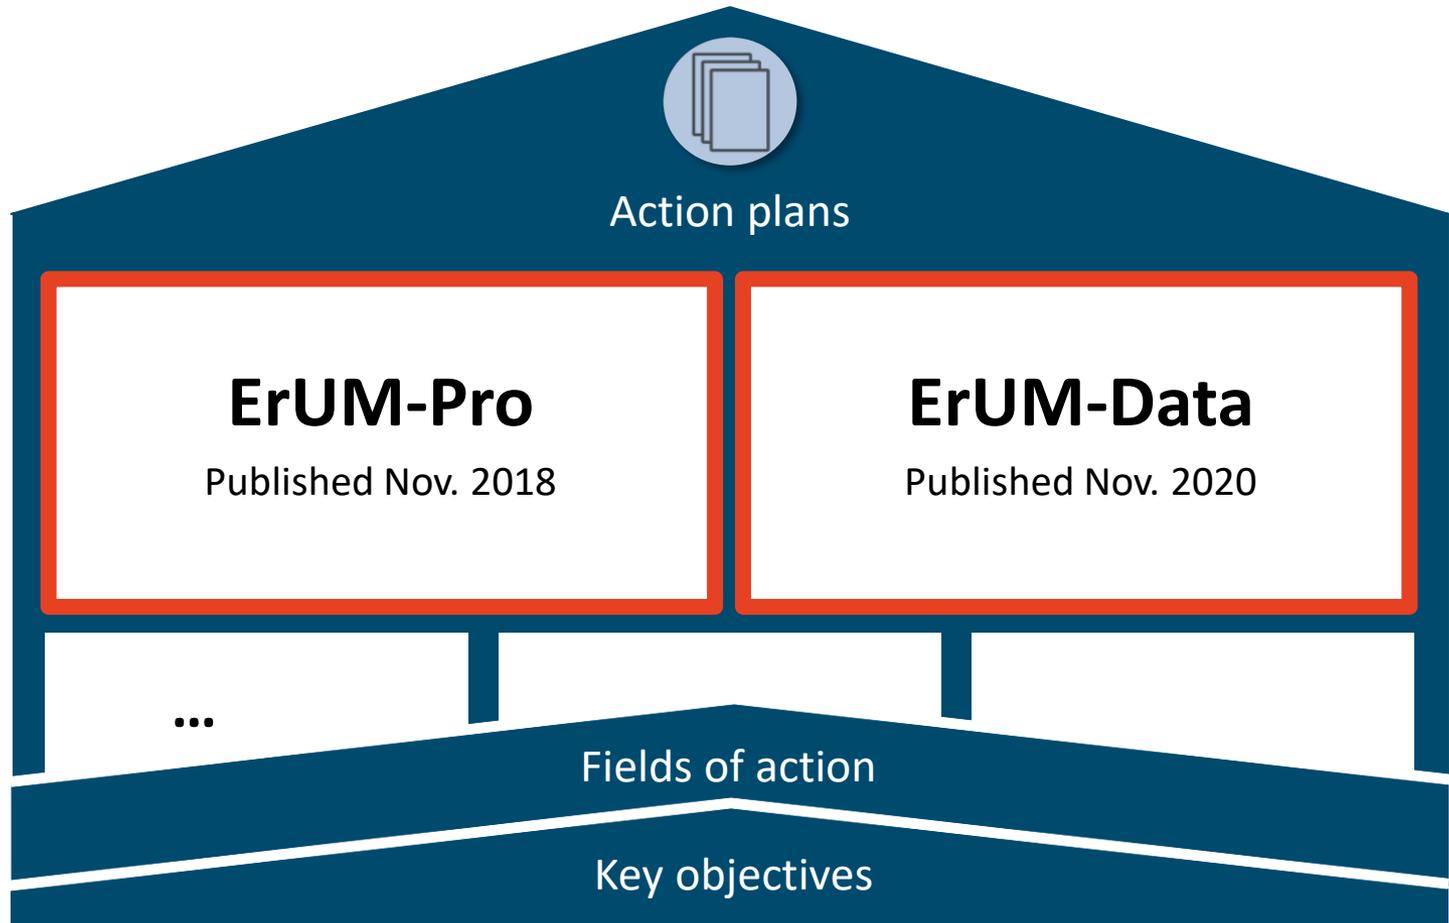

Transfer &
participation

Implementation

Action plans

Specifying and realizing ErUM

Action plan ErUM-Data

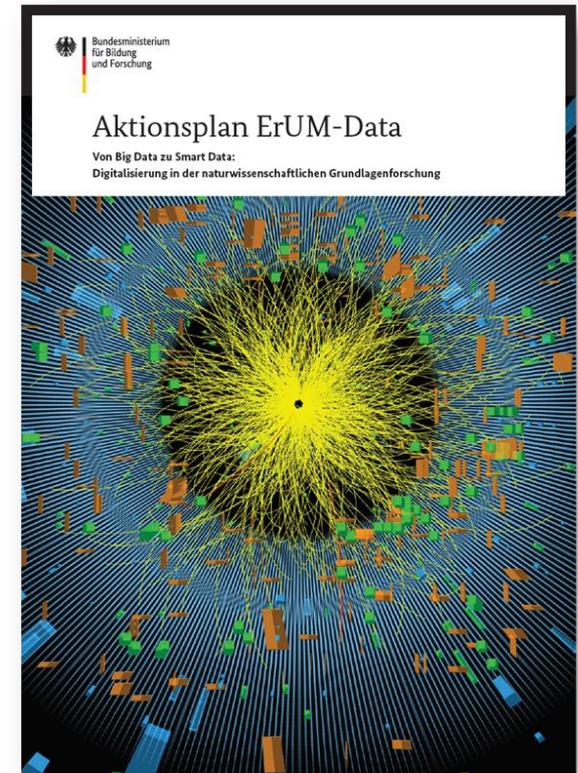

From Big Data to Smart Data: Digitalization in fundamental research

Framework for

- A coordinated and unified approach to digitalization
- New and efficient structures for interdisciplinary R&D
- Dynamic initiation, evaluation and adjustment of measures

Goals

- Address the challenges of digitalization in basic research in ErUM at research infrastructures
- Connect relevant players and structures
- Expand digital competencies in basic research
- Strengthening transfer and communication – in and beyond ErUM

Action plan ErUM-Data

Fields of action

		Topics		
		Research data management	Federated digital infrastructures	Software and algorithms
Goals	Networking	○	○	○
	Digital Competencies	○	○	○
	Transfer & Communication	○	○	○

Measures in ErUM-Data

Action plan ErUM-Data

Implementation timeline

Action plan ErUM-Data

First funding call: Software and algorithms with focus on AI and ML

Overarching goals

- Addressing the challenges of digitalization in basic research in ErUM
→ thus unlocking potentials of AI and ML methods for ErUM
- Connecting relevant players and structures
→ Interdisciplinary collaborative funding:
 - within ErUM, with computer science/data science/mathematics, with industry
 - Universities and non-university research institutions
- Strengthening transfer and communication – in and beyond ErUM
→ cooperation between research and industry

Project requirements

- Coordinated and broad approach
- Supporting overarching solutions

Transfer & Innovation

Preparation of an action plan

Goals

- Improve the visibility of the significance of fundamental research for the innovation chain
- Increase the scope of successful approaches of transfer initiatives
- Exploit the potential for innovations of cutting-edge research in Germany
- Promote the transfer from fundamental science into the industry and society via specific measures
- Intensify the exchange and cooperation between science and industry

Current programme

ErUM-Pro: Programme “Particles”

Funding period 2021 - 2024

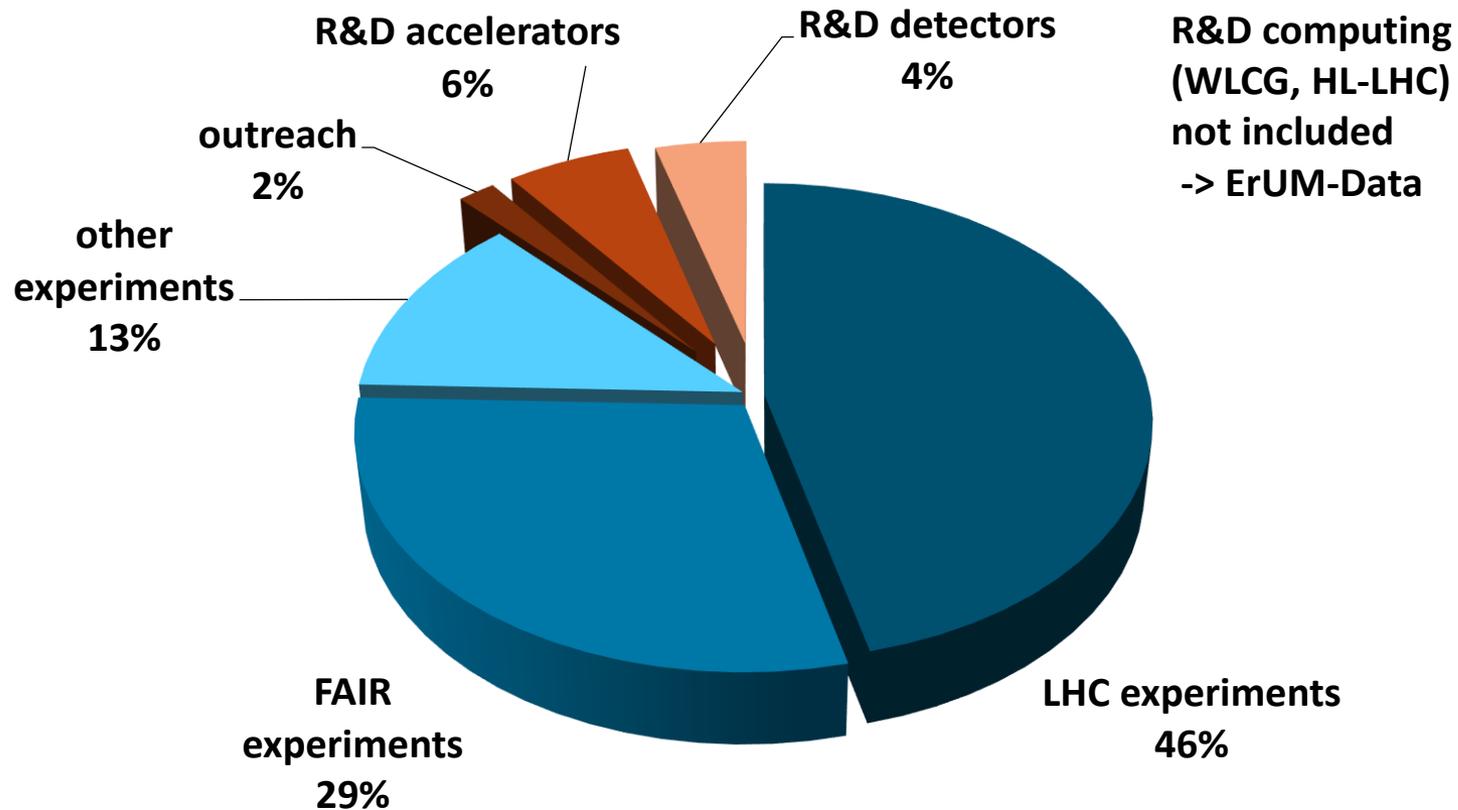

Total: EUR 104,7 million

ErUM-Pro: Programme “Particles”

Funding period 2021 - 2024

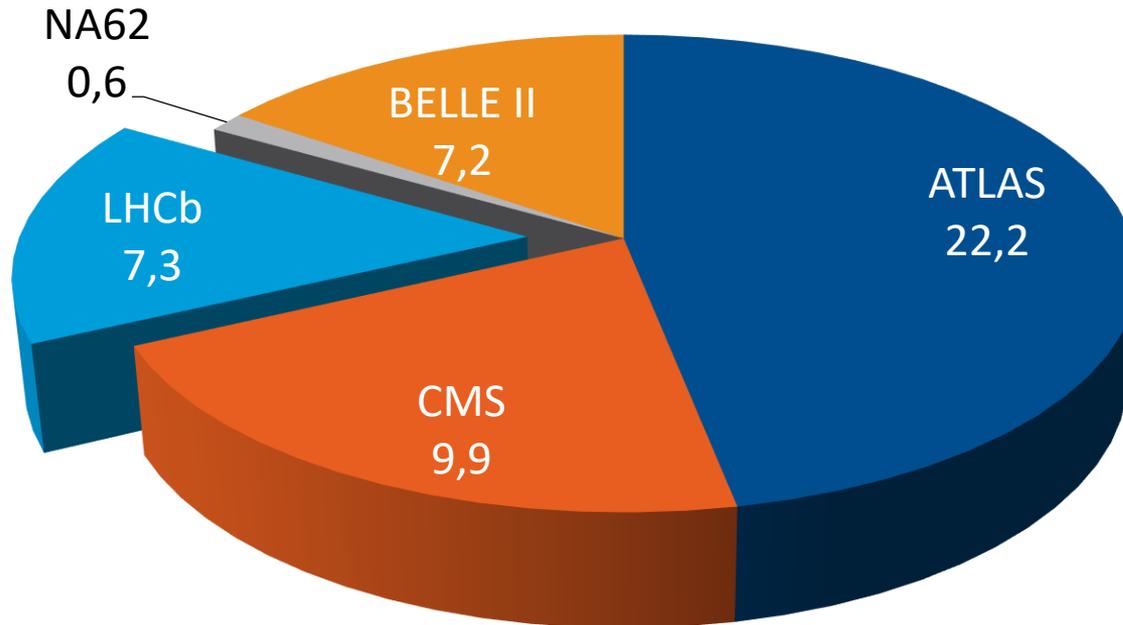

Total: EUR 104,7 million

Elementary Particle Physics

Funding period: 2021 - 2024

Total: EUR 47 million

BMBF priorities:

- upgrade phase I (Core)
- experiment: operation/service
- methods/tools for data analysis

ErUM-Pro: LHCb (incl. theory, FSP)
2021-2024: EUR 7,3 million
