'AOB' summary:
Third-Party-Copy test/migration: <https://its.cern.ch/jira/browse/ADCINFR-166>

6/30: New pilot releases (v 2.12.1.62, followed by fixed version 2.12.2.1) - see:
http://www-hep.uta.edu/~sosebee/ADCoS/pilot2-v2.12.1.62-2.12.2.1-6_30_21.pdf

=====

Site-specific issues:

1) 6/28: MWT2 - DAST shifter reported a problem with some jobs failing at the site ("Remote file could not be opened").
https://ggus.eu/?mode=ticket_info&ticket_id=152799 in progress.

Follow-ups from earlier reports:

(i) 6/22: AGLT2 - squid service degraded (node sl-um-es5.slateci.io). https://ggus.eu/?mode=ticket_info&ticket_id=152708 in progress,
<https://atlas-adc-elisa.cern.ch/elisa/display/2752?logbook=ADC>.

Update 6/28: squid service running under SLATE was restored. ggus 152708 was closed.

(ii) 6/23 early a.m.: AGLT2 - source file transfer errors ("ERROR: Copy failed with mode 3rd pull, with error: [davix2gliberr] Transfer failed: failure: Remote copy failed with status code 0: Failed to connect to IP|HOST:PORT PORT"). Some dCache nodes came online prior to AFS starting, resulting in some out-of-date CRL's. These have been updated - will close the ticket after verifying the fix.
