Operations in the HTCondor pool at CERN

Tuesday, 21 September 2021 17:20 (30 minutes)

During the last year the HTCondor pools at CERN have passed the milestone of 300K cores. In this presentation we will cover some of the operational challenges we have found and the various monitoring and automation solutions deployed to tackle them. We will review as well how we envision the evolution of the service in the coming years.

Desired slot length

Speaker release

Yes
