Open stage - Show Us Your Toolbox, followed by office hours

Wednesday 22 September 2021 17:05 (1 hour)

This session is intended to serve as an opportunity for administrators to show the audience how they do their work with and on HTCondor - what are the most useful tools for them to perform their work? Why are they so useful? What do they look (and feel) like?

In case of interest, the session could be split into breakouts at some point in time.

This session will not be recorded. We would appreciate a 'sanitized' (if needed) slide by the contributors for the records, though.

The "open stage" will be followed by breakouts for office hours - see the 'Videoconference' link in Indico for the links.

Speaker release

Desired slot length
