

Quantum computing and Quantum biology

Nana Engo Serge Guy

Professor

Department of Physics

University of Yaoundé I

Cameroon

Topic of interest

- Implementation of a postgraduate module for physics fellows that integrate quantum computing, quantum optics, quantum biology, data science, machine learning and intellectual property.
- Implementation of a regional human capital mobility in these domains.
- Promoting the establishment of intensive undergraduate coding learning communities.

Potential impact

Pooling this different knowledge will allow us to have the human resources capable of carrying out research activities related to innovation and technology, in order to respond effectively to our various issues in energy, materials, health, metrology and climatic changes.
