- Special parts for aviation industry
- Assembly and designing

Combining expertise and experience

- Mectalent was born in 2008 when two companies Coronaria Instruments and Oulun Hienomekaniikka were merged.
- **Coronaria Instruments** has a solid reputation as a global developer and manufacturer of surgical instruments and implants. The company has years of experience and references for delivering solutions for customers all over the world.
- **Oulun Hienomekaniikka** has 25 years of experience in machining demanding components, modules and entire product families for healthcare, defence and other industries.
- 37 employees, turnover 7,5 M€ (2008)
- Member of Cor Group Oy

Solving challenges that others cannot

Mectalent combines highly developed processes, top expertise and absolute accuracy. Our team of experts possesses a high design competence that enables finding the optimal solutions for the most demanding customer challenges.

Mectalent designs and manufactures demanding, complex product families, components, instruments and modules for industrial, healthcare and defence industries. Our operation is based on accuracy, high competence and customer-oriented attitude.

Mectalent offers its customers the unique ability to design and produce solutions that others simply cannot. Mectalent has a proven track record and reputation as a trusted expert who provides solutions for even the most demanding customer needs. Mectalent's cross-disciplinary team possesses a profound understanding of the design and manufacturing process, but also of the end-users requirements.
