

**6<sup>th</sup> Colombian Meeting on High Energy Physics (COMHEP6)**  
**November 29<sup>th</sup> - December 3<sup>rd</sup>, 2021**  
*Hybrid meeting*

**First Bulletin**

The goal of the annual Colombian Meeting on High Energy Physics is to bring together young and senior scientists, theorists and experimentalists, to discuss recent progress in particle physics, cosmology and related areas.

This year the meeting will be hosted at Universidad del Magdalena, in Santa Marta, with the possibility to attend online. There will be dedicated sessions covering a broad range of topics, including Standard Model and beyond, neutrino physics, hadron and flavor physics, dark matter, cosmology and cosmic rays, which reflect the main existing expertise in Colombia.

Instead of a traditional poster session, there will be dedicated slots for short talks (5', english or spanish), where students and young scientists can present their latest works.

It is possible to request financial support for local air tickets (within Colombia), provided there is an accepted abstract and subject to availability of the funds.

For more information, registration and talk submission, please visit the meeting website:  
<https://indico.cern.ch/e/comhep6>

Important dates:

- Registration deadline: 30/09/2021
- Abstract submission deadline: 30/09/2021

Please feel free to contact us for any additional information. We are looking forward to hearing from you at your convenience.
