

Sixth workshop on "Perceiving the Emergence of Hadron Mass through AMBER@CERN" (EHM2021/9)

Monday 27 September 2021 - Thursday 30 September 2021

Perceiving the Emergence
of Hadron Mass through
AMBER@CERN

27 - 29 September 2021
CERN, Geneve - Switzerland

Book of Abstracts

Contents

AMBER @ CERN	1
Meson beams for EIC	1
Model independent extraction of d_v/u_v	1
Proton radius	1
Strange quarks in pions	1
Pion GPDs for EIC and EicC	1
Pion distribution amplitudes	1
Discussion: session I	2
Schwinger mechanism from Lattice QCD	2
Continuum \leftrightarrow Lattice Quark Mass Function	2
Pion DFs with threshold resummation	2
Distribution of glue in the pion	2
Light meson structure and BLFQ	2
Higher-twist effect in pion parton distribution	2
Pion and kaon LFWFs and GPDs	2
Discussion: session II	3
Nucleon axial current	3
Mellin moments of pion and rho DFs	3
Pion in Minkowski space	3
Proton image and momentum distributions from LF dynamics	3
Quark propagation and hadronization	3
Vector-meson production and vector-meson dominance	4
Discussion: session III	4

Session I / 1

AMBER @ CERN

Corresponding Author: jan@tum.de

Session I / 2

Meson beams for EIC

Corresponding Author: doring@email.gwu.edu

Session I / 3

Model independent extraction of d_v/u_v

Corresponding Author: binosi@ectstar.eu

Session I / 4

Proton radius

Corresponding Authors: pineda@ifae.es, antonio.pineda@cern.ch

Session I / 5

Strange quarks in pions

Corresponding Author: braghin@ufg.br

Session I / 6

Pion GPDs for EIC and EicC

Corresponding Author: cedric.mezrag@cea.fr

Session I / 7

Pion distribution amplitudes

Corresponding Author: pimikov@gmail.com

Session I / 8

Discussion: session I

Session II / 9

Schwinger mechanism from Lattice QCD

Corresponding Author: joannis.papavassiliou@cern.ch

Session II / 10

Continuum <-> Lattice Quark Mass Function

Corresponding Author: khepani@gmail.com

Session II / 11

Pion DFs with threshold resummation

Corresponding Author: barryp@jlab.org

Session II / 12

Distribution of glue in the pion

Corresponding Author: lei.chiong@gmail.com

Session II / 13

Light meson structure and BLFQ

Corresponding Author: xbzhao@impcas.ac.cn

Session II / 14

Higher-twist effect in pion parton distribution

Corresponding Author: jhruan@phy.ecnu.edu.cn

Session II / 15

Pion and kaon LFWFs and GPDs

Corresponding Author: jose.rodriguez@dfaie.uhu.es

Session II / 16

Discussion: session II

Session III / 17

Nucleon axial current

Corresponding Author: jsegovia@upo.es

Session III / 18

Mellin moments of pion and rho DFs

Corresponding Author: marius.loeffler@physik.uni-regensburg.de

Session III / 19

Pion in Minkowski space

Corresponding Author: wayne@ita.br

Session III / 20

Proton image and momentum distributions from LF dynamics

Corresponding Author: ydrefors@kth.se

Session III / 21

Quark propagation and hadronization

Corresponding Author: andrea.signori@unipv.it

Session III / 22

Vector-meson production and vector-meson dominance

Corresponding Author: cdroberts@nju.edu.cn

Session III / 23

Discussion: session III

Workshop on RF-separated beams for AMBER – Kick-off meeting / 24

Workshop on RF-separated beams for AMBER – Kick-off meeting
