## Alignment network error propagation and alignment examples

*Wednesday 1 June 2022 14:40 (25 minutes)*

This presentation will briefly talk about error propagation in alignment networks in tunnels. It will also give a summary of alignment experiences that were reported at the FCC-ee optics tuning and alignment mini-workshop. Finally the presentation will show some results from SLAC in particular and the importance of alternate measurement methods added to conventional laser tracker and leveling measurements.
