Poster Session

Virtual Poster Session will be held over Twitter, to allow participants of the 1st Workshop of LaPMET 2021 to share and discuss their research.

(#LaPMET2021Poster)

!! THE TWO BEST POSTERS OF EACH SESSION WILL BE SELECTED FOR ORAL FLASH PRESENTATION !!

How to participate in the virtual poster sessions?

1. **Register** to participate in the poster session.

2. Create a Twitter account (if you do not already have one). Make sure your tweets are public to allow all LaPMET2021 participants to view and engage with your poster. Please familiarize yourself with adding and searching hashtags (e.g. **#VCT2021Poster**).

3. Tweet your poster with a short title and hashtag **#LaPMET2021Poster** during the conference.

Guidelines for a Twitter-friendly Poster

In the virtual format poster you can be creative and unconventional. Use your imagination!

- Format/Size: Posters should be uploaded as images (JPEG/PNG) with up to 5MB in size. An aspect ratio landscape of 2:1 (width:height) is recommended to allow the entire poster to be visible in the tweet preview. Virtual posters should be designed in a way so that the text and graphics are clearly readable on a desktop/laptop screen.
- Character limit: Please add a brief title and description to your poster. The character limit in a tweet is 280 characters. However, you could use multiple linked tweets ("threads") to add additional details.
- External links: In a tweet, you can also add external links. For example, a link to your paper, a website/database, a video etc.
