

CeFEMA's Research on Quantum Materials and Quantum Technologies & Integration with LaPMET's Strategic Plan

Thursday, 23 September 2021 11:30 (20 minutes)

Since its formation in 2014, CeFEMA has maintained a main focus on Quantum Materials. In this talk, I will describe the lines of research we have pursued during the last few years, the results we have achieved, and the collaborations we have fostered. Next, I will discuss how our research plans integrate with LaPMET's strategy and propose some directions to continue strengthening this research line.

Scientific Area

Quantum materials and quantum technologies

Primary author: RIBEIRO, Pedro

Presenter: RIBEIRO, Pedro

Session Classification: Quantum materials and quantum technologies

Track Classification: Quantum Materials and Quantum Technologies
