- CHEP2012, NYC, 21-25th May 2012

GDB Issues

- MU Pilot Jobs, SCAS, Argus, gLExec
- CREAM
- Virtualisation
- Installed capacity
- **OPN, LHCONE**
- **CVMFS**
- Information Service

glexec

- Many sites have now installed
- OPS and experiment tests working
- TEG will urgently discuss the identity requirements and report by the end of the year.
- Until then a lower priority for more sites to install glexec
- Argus still desirable for other reasons.

LCG-CE/CREAM

- Sites no longer required to run an LCG-CE.
- Proposed removing from Availability calculation in October
 - Provided ACE worked OK (it did)
 - But reliable CREAM for SGE not yet rolled out
- MB postponed confirming this change until the end of October.

Today

- Technical Evaluation Groups
- WLCG Networking
- Middleware
 - Staged Rollout
- User Support
- CVMFS
- Tier3s
