What We Want

Slide courtesy of Ulrich Schwickerath

What We Need

- ◆ Image Generation Policy ✓
 - <https://documents.egi.eu/document/771>
- ◆ Contextualisation Standard ✓
 - Mount CDROM image & execute scripts
- ◆ Catalogue and Exchange Tools ✗
 - Partly my fault and summer
 - **No** members of working group have a **mandate to support any code** for use at other sites or as a central catalogue.
 - » **CERN supported VMIC would likely be much appreciated.**
 - StratusLab Marketplace is an option for a central catalogue
 - » But signed image lists (and a local repository/catalogue) are still needed.
 - CernVM?
 - **RAL F2F meeting in December to restart work in this area**
