My experience as an ALICE analyser

Wednesday 8 December 2021 10:27 (15 minutes)

Scientific collaboration plays an ever-increasing role in our world. The need for tools that make it easy to share results, portable setups, and code is fundamental. The use of CERNbox and Jupyter notebooks with SWAN has become de facto the standard to ensure collaboration across many people and to handle several projects. In this talk, I will report on my experience as an ALICE user, and I will be giving my feedback and a few suggestions.
