

Session Program

8-10 Dec 2010

ISOLDE Workshop and Users meeting 2010

Solid State II

CERN, 503/1-001 - Council Chamber

Thursday 9 December

16:50

Solid State II

Session | **Location:** CERN, 503/1-001 - Council Chamber

16:50–17:10 **Possibilities provided by ISOLDE for tracer diffusion experiments**

Speaker

Prof. Thomas Wichert

17:10–17:30 **Recent Mossbauer results using ^{119}In**

Speaker

Dr Karl Johnston

17:30–17:50

The sign of the electric field gradient of wide bandgap semi-conductors measured with β - γ angular correlation

Speaker

Mr Patrick Kessler

17:50–18:10 **Recent results using radiotracer PL at ISOLDE**

Speaker

Mr Joseph Cullen

18:10–18:30

Beta-NMR as a novel technique using radioactive beams for biophysical studies

Speaker

Alexander Gottberg

18:30
