Contribution ID: 170 Type: Parallel talk

Exclusive Lepton Pairs at the Electron-Ion Collider

Thursday 5 May 2022 10:20 (20 minutes)

Two-photon exclusive production of lepton pairs at the Electron-Ion Collider opens interesting research directions thanks to a very high luminosity and clean experimental conditions at the EIC. First estimates of scientific potential for such studies are given. In particular, they consider unique measurements of the proton and ion electromagnetic form-factors, and searches of anomalous couplings of τ leptons.
