

The document

- Draft sections by Oct. 15th
- Finished document by Nov. 1st.
- On time for CERN workshop on Nov. 5-6
- All simplified models will be posted to a webpage
- Document refers to this website, the simplified models, and describes organization, coverage of signatures, and suggestions for presenting results
- The authorship will be the union of the authors of the notes describing the simplified models

Goals for Today

- Summary from each working group of their approach (**to be presented later today**), i.e.
 - list of theories inspiring the simplified models
 - list of simplified models
 - guiding principles of reduction process
- Definitions of simplified models on paper, with authors who can be harassed
- Can start drafting notes (latex template available at <http://indico.cern.ch/getFile.py/access?resId=0&materialId=0&confId=107270>)
- Suggestions for presenting results (plots, phase space that should be explored, parameters that should be varied)

Working Groups

- Exotics
- Resonances
- Photons
- Leptons (tau where appropriate)
- Heavy Flavors (t, b, tau)
- Jets

Discuss with other groups during the working group sessions if there is overlap

We'll soon tell you finalized schedule for today
