

50 and 75 ns operation

Tuesday 7 December 2010 18:05 (20 minutes)

Two machine development sessions have been performed in order to understand potential limitations for the operation of the machine with 50 and 75 ns beam spacing.

The main results of the studies and a possible outlook for 2011 will be presented.

Presenter: ARDUINI, G.

Session Classification: Session 1: LHC beam operation: review of 2010 and settings the scene for 2011
